Detail:

% M3 Survival Rate untuk unlock Quarterly Bonus, dihitung berdasarkan pada Total SA Survival Subs(table hijau)/Total SA Acquisition (table hijau)

Contoh simulasi pada SPV A (BKS1-SPVDSA-001)

% M3: (table hijau) 350/405 = 86%

Quarterly Bonus: (table biru) 502 SA. 12,000,000 + [(502 – 500) x 30,000] = 12,000,000 x 60,000 = 12,060,000

1. Skema ini berlaku sejak Performance 1 September 2026 untuk Payout pada 15 October 2026.
2. Populasi SA yang diperhitungkan adalah SA month 1 bulan full sesuai dengan data Power BI.
3. Posisi SPV yang digunakan dalam perhitungan Activation Fee Adalah latest position end of month bulan performance yang sedang dihitung. Contoh: Activation Fee Performance September, maka posisi spv akan berdasarkan pada 30 September 2026.
4. **Jika SPV terlibat FRAUD (proven), maka Incentive dan Basic Fee tidak akan dibayarkan.**
5. Related Poin 2 berlaku juga terhadap AE Quality, SPV Quality dan AE Elite Promotion
6. **KPI Bonus** dihitung berdasarkan amount Product Mix & Productivity Incentive. MOB yang digunakan adalah MOB sejak effective date saat menjadi SPV.
 - Jika SPV dengan MOB ≤ 3 , maka KPI Bonus yang didapatkan adalah 100% hanya dari Productivity Mix. Tanpa memperhitungkan Participation Bonus.
 - Jika SPV dengan MOB > 3 , maka KPI Bonus yang didapatkan sesuai dengan tiering yang ada dikalikan dengan total Productivity Mix + Participation Bonus
7. **Survival Rate** akan dihitung berdasarkan data pada Power BI. Jika performance yang sedang dihitung adalah bulan September 2026, maka **M3 merupakan June 2026** dan **M5 merupakan bulan April 2026**. SA yang dianggap eligible, dalam perhitungan M3 maupun M5, Adalah SA yang berstatus PAID berturut-turut tanpa ada UNPAID ditengah periode. Untuk M3 hanya akan dibayarkan khusus untuk product paket regular (monthly) & M5 tidak membayarkan product / paket $> = 5$ bulan. Cut off penarikan data pembayaran pelanggan yang digunakan adalah data akhir bulan. Contoh: Activation Fee Performance September, maka akan digunakan penarikan data sampai dengan tgl 30 September 2026 untuk M3 & M5.
8. **Graduation Bonus** dihitung berdasarkan data AE Quality (OJT Promote to AE PRO & AE PRO promote to AE ELITE) yang biasa dihitung oleh tim Channel. Jika performance yang dihitung adalah bulan September 2026, maka data Promotion juga atas September 2026. Bukan berdasarkan deviasi dari atasannya.

9. **Monthly Performance Bonus** dihitung berdasarkan SA eligible dengan bulan performance yang sama yang sedang dihitung. Bonus dihitung secara lump sum (bukan progressive, bukan per SA)
10. **Quarterly Bonus** ditentukan berdasarkan rentang productivity (SA per Kuartal) tim sales dibawah SPV . Besaran nominal bonus merupakan flat amount, bukan progressive ataupun dikalikan per SA. Khusus untuk SPV yang mencapai range SA ≥ 500 , maka bonus akan ditambahkan sebesar 30,000 yang dikalikan dengan incremental SA.
 - Note: Untuk unlock quarterly bonus, survival rate harus $\geq 80\%$ pada performa kuartal
 - Contoh: SPV mendapatkan 510 SA. Quarterly Bonus = $12,000,000 + [(510 - 500) \times 30,000] = 12,000,000 + 300,000 = 12,300,000$
